Product Description

HuntVe Onrange™ All-Electric 4x2 Crew Utility Vehicle

New from the HuntVe™ line up of electric UTVs is the Onrange™ 4x2 featuring a 72 volt high-performance electric system. When the harshest off road conditions are not present and four wheel drive is not necessary, the all electric Onrange™ is built with a smooth ride in mind while not compromising the need for 25 MPH speed, LED lights, and comfort.

The Onrange™ color options include injected molded Black, Montana Blue, Sage Green, Orange, Fire Red and Realtree® camouflage. Performance of the Onrange™ has been boosted with a high output stealth motor, 4 wheel independent suspension, 25" 6-ply tires, and optional electronic power steering - making this the most enjoyable drive on and off road. The configuration choice is the single bench model for 2 people with cargo or the double bench Crew designed for 4 people with cargo.
