Product Description

HuntVe Terlingua All-Electric 4x4 Crew Utility Vehicle

New from the HuntVe line up of electric 4x4 UTVs is the spiced up Limited Edition Terlingua 4x4 Crew. Featuring a 72 volt high-performance electric system and dual motor technology, the all electric Terlingua is built to get you where you are going – the fun way! For the first time, HuntVe has introduced a model not focused on a camouflage pattern, rather a bold injected molded black, Montana Blue, Sage Green, Terlingua Orange, and Fire Red. Additional trim features included 12in aluminum custom powdered coated custom wheels, custom two-tone seats, and brush guard. The performance of the Terlingua has also been boosted with highest output motor combination (40 HP) in the HuntVe lineup yet. Its 4 wheel independent suspension, 25” 6-ply tires, and optional electronic power steering makes this the most powerful, stealth, and performance driven alternative fuel side by side made.
